Weather Key Points

Regional Operations Center

Western Region

Friday, October 14

- One more day of above average temperatures and dry conditions is expected on Friday. No significant heat impacts are expected due to cooler overnight temperatures.
- Scattered showers and thunderstorms will return to much of southern California, Friday night through Sunday night.
 - The best coverage still looks to be Saturday into Sunday. Some storms could produce locally heavy rainfall, though exact precipitation amounts remain somewhat uncertain at this time.
 - Flash Flood watches are in effect for portions of Imperial, Riverside and San Bernardino Counties for Saturday morning through late Saturday night.
- A cooling trend with much cooler temperatures is also expected statewide beginning Saturday and continuing through Monday
- A few showers could develop across northwest coastal locations for the early to middle portions of next week, though any rainfall looks to be light.

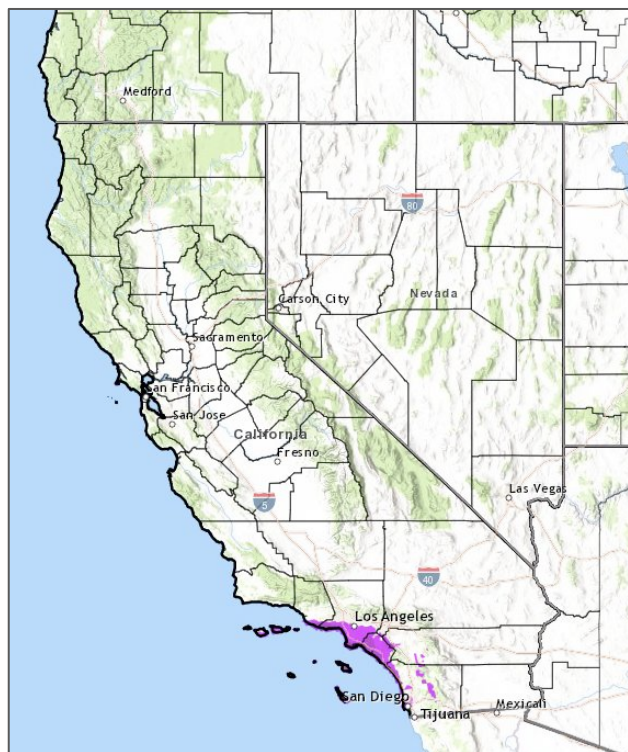

Precipitation Forecast

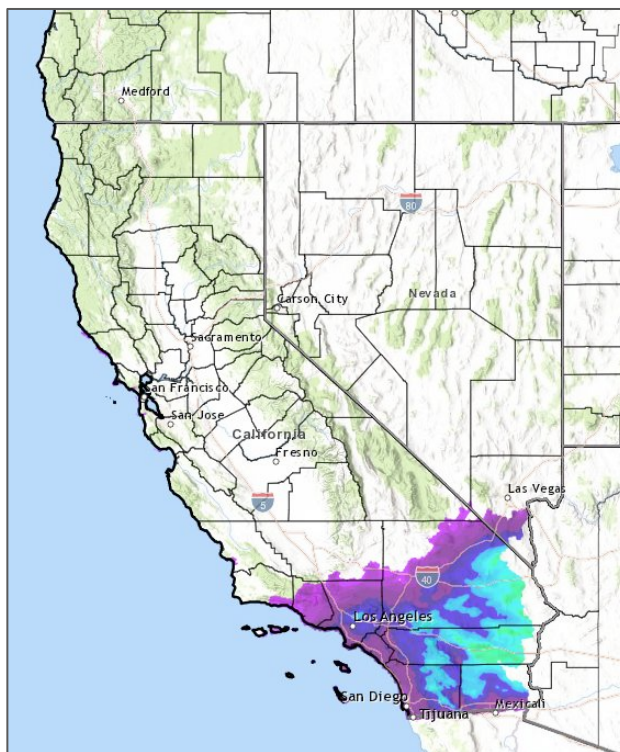

Regional Operations Center

Western Region

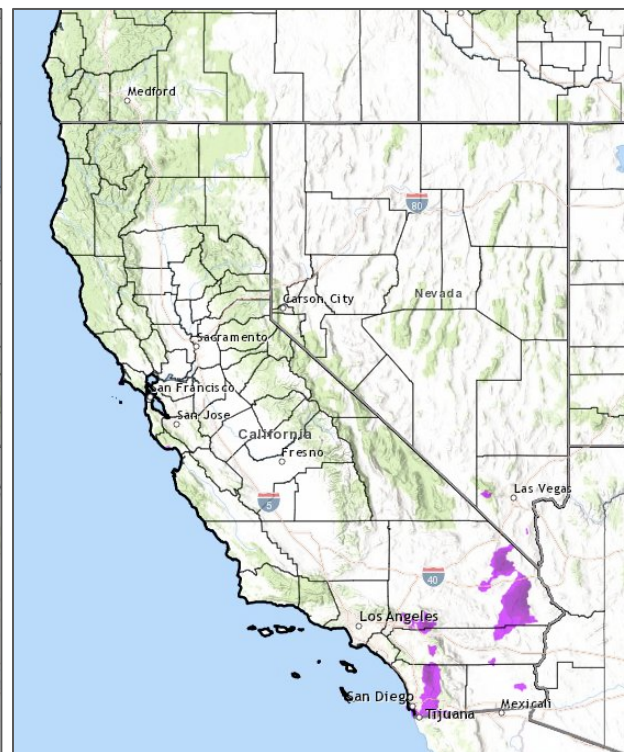

Friday, October 14

Friday

Saturday

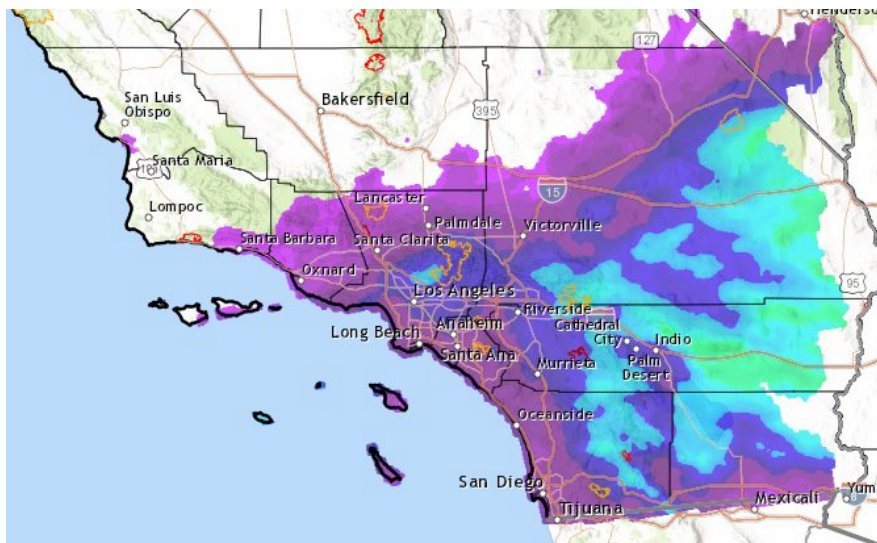

Sunday

Important Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms will produce locally much higher rainfall amounts.

Precipitation (inches)

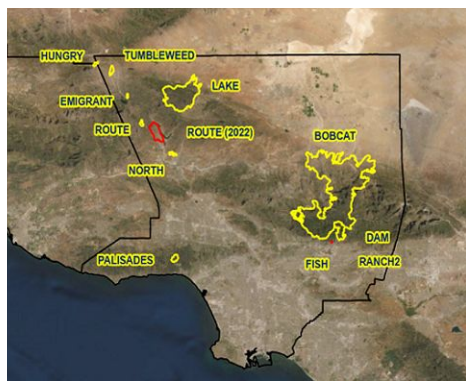

Precipitation Forecast

Burn Scars of Greatest Concern on Saturday

- Apple/El Dorado burn scar
- LA County Burn Scars: Lake, Tumbleweed, Emigrant, Route, North, Palisades, Bobcat, Fish, Dam, Ranch2

Note: This is not expected to be a particularly significant event, but burn scar flooding is possible if a strong storm develops with heavy downpours.

Important Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms will produce locally much higher rainfall amounts.

Precipitation (inches)

Weather Outlook (6-14 Days)

Regional Operations Center
Western Region
Friday, October 14
